Overall Credit Costs: FY10 to Q2FY25

Drivers of Credit Costs

- **Reduced lumpiness of the wholesale business:** Given quality and granularity of the wholesale book, the new credit costs should be lower for this cycle as compared to previous cycle
- **Provisioning rules tightened and rule based, PCR an outcome:** We now operate at 15% to 20% higher than where we used to previously operate. This needs to be factored in the incremental provisioning in the short term
- **We feel comfortable growing our retail unsecured book now:** It will give us better risk adjusted NIMs, credit costs standalone will be higher
