Drivers of Credit Costs

- Reduced lumpiness of the wholesale business: Given quality and granularity of the wholesale book, the new
 credit costs should be lower for this cycle as compared to previous cycle
- Provisioning rules tightened and rule based, PCR an outcome: We now operate at 15% to 20% higher than where we used to previously operate. This needs to be factored in the incremental provisioning in the short term
- We feel comfortable growing our retail unsecured book now: It will give us better risk adjusted NIMs, credit costs standalone will be higher
